Objective

Second-year Computer Science student with a strong passion for Artificial Intelligence, seeking an AI Engineer Internship to apply foundational knowledge of machine learning and programming to real-world projects. A fast learner and team player, eager to grow under the guidance of experienced engineers and contribute to hands-on AI development.

Technical Skills

Languages	Python, C/C++, SQL, Java
Tools	PyTorch, CUDA
MLOps & Tools	Git, Docker, Linux, Jupyter, FastAPI, Weights & Biases
Concepts	Deep Learning, Computer Vision, Computer Graphics

Education

2024–2029 **Bachelor of Science in Computer Science**, *Major Technical University*, Vietnam

- Core Focus: Artificial Intelligence, Advanced Database Management Systems, Distributed Systems, Software Engineering.
- Relevant coursework: Machine Learning, Data Structures & Algorithms, Linear Algebra, Probability & Statistics.
- GPA: 80/100

Projects

Image Classification with CNN, *Personal Project*

- Built and trained a convolutional neural network in PyTorch to classify images, achieving ~XX% accuracy on the test set.
- Applied data augmentation and transfer learning (ResNet) to improve generalization.
- Deployed the model as a REST API using FastAPI and Docker.

RAG Chatbot with LLMs, *Personal Project*

- Developed a retrieval-augmented generation chatbot to answer questions over a custom document set.
- Used sentence embeddings and a vector database for semantic search, integrated with an LLM for answer generation.
- Implemented prompt engineering strategies to reduce hallucinations and improve response quality.

Experience & Activities

20XX **Member**, *AI/Data Science Club*, Ho Chi Minh City

- Participated in study groups on deep learning and shared knowledge through internal workshops.
- Collaborated on team projects using Git for version control.

Certifications

IELTS 5.5
